1. Visit to families and family counseling

We regularly visit the slums and families. We need to have constant contact with the families. We counsel the families either in their houses or in our centre as they face many problems each day. Our visit to the slums helps us to understand their situations as they try to explain their daily struggles. We motivate the parents to understand the present culture of the youth.
2. Coaching classes for the school going children

We have regular coaching classes and organized study for about 50 school going children every evening from 5.30 to 7.30 p.m. These children cannot afford to go for tuitions which are very costly. The weaker children are given special attention. Certain incentives are given to encourage them to do better. The children get chance daily to play either before their study begins or after their study which brings relaxation and fun. They love to play here as they do not have much place to play near their houses. Some times they do some physical exercises which keep them alert and active. The children learn to clean their places of study. They do a bit of gardening sometime. They like to water the garden. The children are encouraged to save little money which will help them at the beginning of the school.
